

I'm a **Human Development Worker** and my job is to help fellow Indonesians prevent stunting in young children.

Remember! Services in **5 sectors** must converge so we can prevent stunting.

CONVERGENCE INDICATOR

HEALTH

- Prenatal care
- Iron & folic supplements
- Height monitoring
- Post-natal care
- Immunizations

ECED

- Parenting classes
- ECED attendance

WATER & SANITATION

- Access & use clean water
- Access & use sanitation facilities

NUTRITION

- Nutrition counseling classes
- Home visits to provide integrated counselling

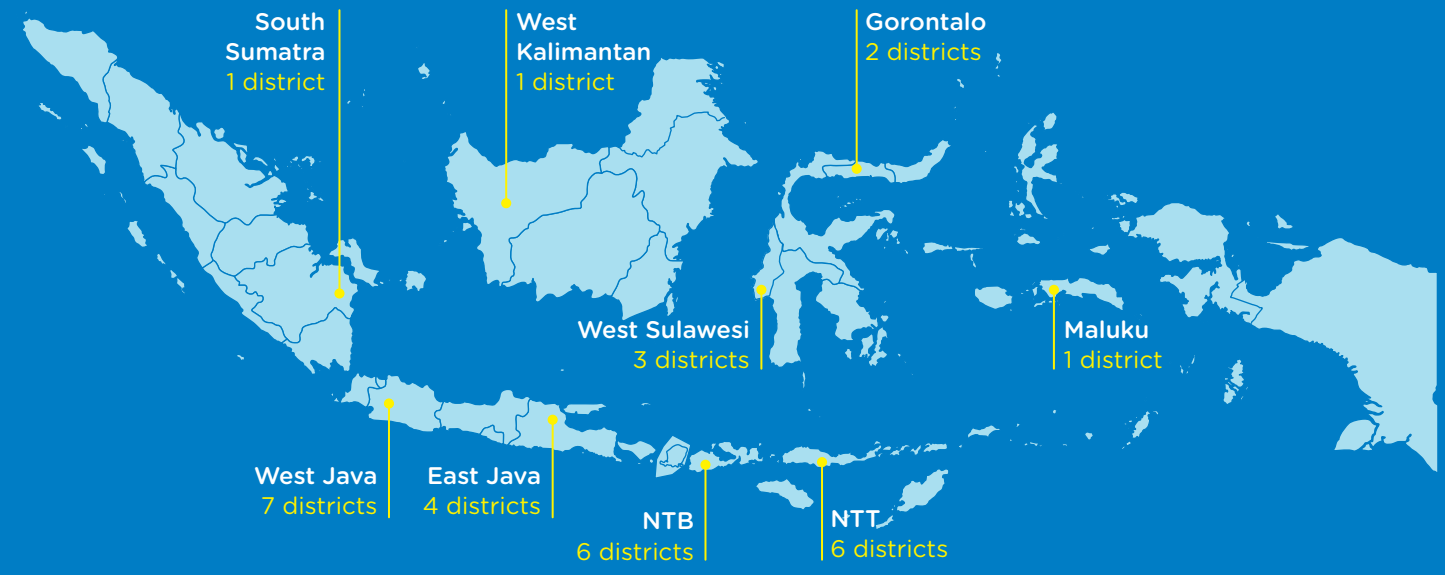

CONVERGENCE

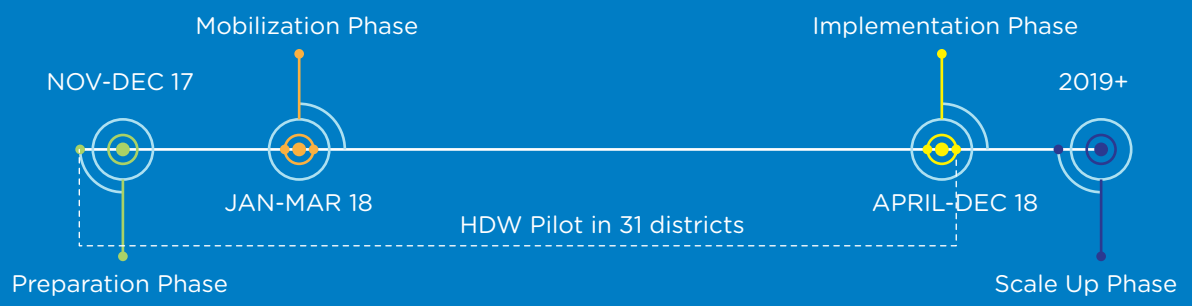

SOCIAL PROTECTION

- Birth certificate for 0-2 year olds
- Household health insurance card

HDW PILOT IN 31 DISTRICTS IN 2018

IMPLEMENTATION AND SCALE UP PLAN

2018		2019 (National Scale Up)	2020	2021
Generasi Locations	Government Program			
175 HDWs 9 provinces 31 districts 175 villages	34 provinces 100 priority districts (incl Generasi location)	34 provinces 160 districts	34 provinces 390 districts	75,000 HDWs 34 provinces 514 districts 75,000 villages

GROWING UP SMART AND TALL

AKU TUMBUH TINGGI DAN CERDAS

Berdasarkan Data WHO, 2006

Pastikan pertumbuhan anak kita sesuai usia

TIKAR INI HANYA SEBAGAI ALAT DETEKSI DINI STUNTING

#CEGAHSTUNTINGITUPENTING

Stunting is the impaired growth and development that children experience due to poor nutrition, repeated infection, and inadequate psychosocial stimulation.

Through an ambitious stunting prevention program (2018-2021), the Government of Indonesia will reach

- 48,000,000 BENEFICIARIES**
- 514 DISTRICTS**
- 75,000 VILLAGES**

The World Bank and the Government launched the Human Development Worker (HDW) Pilot in 2018 by engaging

3,105 HDWs in **31 DISTRICTS**

- The World Bank collaborates with the Government on:
- Piloting the HDW Program
 - Designing & implementing the stunting prevention program

*2013 National Health Survey (RISKESDAS)

1

PETA WILAYAH DESA SUKABUNGAH

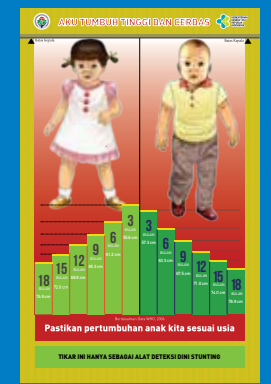

Create a map of 1,000-day households and their access to services in the five sectors.

2

Organize a Village Stunting Summit and develop an annual convergence activity plan. The Summit involves all key stakeholders in the village.

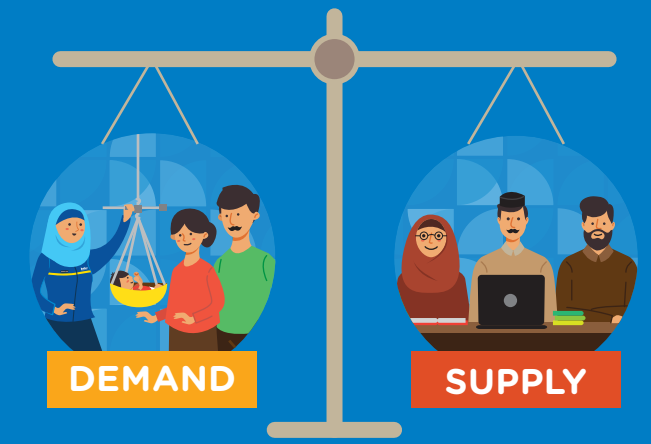

3

Consolidate and assist villages in convergence efforts to prevent stunting and monitor village convergence indicators. For example, the measurement of children's growth every month using length mat.

4

Coordinate quarterly stakeholders meeting to evaluate all activities, and facilitate the planning of stunting prevention activities for the following year.

I visit families in their homes and monitor their development so that I can prioritize delivery of stunting-prevention services to those who need them.

I also work with village leaders to ensure that village funds are allocated for human development services.

The demand for and supply of services in my village must be aligned.

I was selected by my community to be an HDW. Once my village leaders approved, I signed a contract with the sub-district heads.

I receive financial support from village funds. With good performance, I may also receive financial or non-financial incentives on a quarterly basis.

By 2021, every village in Indonesia will have an HDW like me. This means that every village will be able to prioritize spending to meet villagers' needs, prevent stunting and provide secure employment for all 75,000 HDWs.
